VoiceSignal is the leading developer of state-of-the-art speech solutions for wireless mobile devices.

With an estimated 90% **market share** and customers that include Samsung, Motorola and Nokia, VoiceSignal is the leading provider of speaker-independent (no training) embedded speech recognition solutions to the telecommunications industry.

All VoiceSignal applications are designed to make today's small and increasingly complex mobile phones easier for the consumer to use. VoiceSignal's solutions are cost effective, fast, accurate, noise robust, flexible, easy to use, easy to integrate and provide value for the user, the manufacturer and the operator.

VoiceMode™ Demo

VoiceMode™

VoiceMode is the exciting new break-through dictation software that lets users say it, see it and send it!
